Education

Purdue University

Bachelor of Science in Computer Science

West Lafayette, IN

Expected May 2029

- **GPA:** 3.87 | **Activities:** CS Women's Network, Sikh Student Association, College of Science Ambassadors, InnovateHer
- **Relevant Coursework:** Programming in C, Object-Oriented Programming (Java), Data Structures & Algorithms, Discrete Mathematics

Experience

C.O.R.E. Lab Research Intern

Purdue University

June 2026 - Present

West Lafayette, IN

- Designed and developed the Heads Up website to translate user web design research into optimized user experience strategies
- Synthesized user feedback and behavioral data to design interface layouts aligned with target audience expectations

Social Media Student Coordinator – College of Science

Purdue University

May 2026 – Present

West Lafayette, IN

- Produced multimedia content and graphic design for college marketing based on target demographic needs
- Supported execution and documentation of college events, ensuring strong attendee experiences and media coverage

CS Bridge TA

Purdue University

Aug 2026

West Lafayette, IN

- Mentored 60+ incoming students through an intensive two-week introductory computer science curriculum
- Provided one-on-one assistance with foundational concepts in object-oriented programming and algorithmic problem-solving

Development Team Member – InnovateHer

Purdue University

Feb 2026 – Present

West Lafayette, IN

- Collaborated on technical development and scaling of software initiatives and platforms supporting the organization
- Engaged in agile sprint planning and technical code reviews to ensure robust software implementation

College of Science Ambassador

Purdue University

Aug 2025 – Present

West Lafayette, IN

- Represented the College of Science by presenting student life dynamics to groups of prospective students and families
- Consulted on majors, academic paths, and career milestones to assist students in rendering critical college choices

Projects

BollyBeat Lounge | Python, Flask, Gemini API, Render

July 2026

- Engineered a full-stack Bollywood music recommendation web app utilizing a scalable Flask backend architecture
- Integrated Google Gemini API to process user preference prompts and generate personalized song recommendations

Under The Bell Tower | InnovateHer Hackathon | JavaScript, CSS, Node.js

Feb 2026

- Architected a Purdue-themed multiplayer browser game utilizing a client-server event-driven architecture
- Engineered real-time chat infrastructure and low-latency state synchronization mechanisms for multi-user interactivity

Restaurant Reservation Manager | Java, Swing

Nov 2025

- Developed a multi-client reservation platform utilizing advanced File I/O, object concurrency, and network sockets
- Designed an intuitive Java Swing GUI backed by secure user authentication and multi-threaded scheduling logs

BoilerRoute | HelloWorld Hackathon | JavaScript, React, Vite

Sept 2025

- Built a responsive mobile-first web interface rendering real-time campus parking metrics organized by location
- Implemented a crowdsourced lane-closure warning system incorporating rigorous data-validating community voting logic

Leadership

Women in Science Mentor

Purdue University

Apr 2026 – Present

West Lafayette, IN

- Provided direct academic guidance to undergraduate peers navigating introductory STEM coursework and technical tracks
- Participated in specialized community networking mixers and academic panels targeting retention of women in science

Skills

Languages: Python, Java, JavaScript, TypeScript, C, HTML/CSS

Tools: React, Flask, Git, GitHub, VS Code, IntelliJ, PyCharm
